Threat intelligence platforms help organizations **collect, analyze, and act on data about potential and active cyber threats, turning raw indicators into meaningful insights.**

They enable faster detection, informed decision-making, and proactive defense by **centralizing threat data, enriching alerts, and integrating with existing security tools.**

1

MISP (Malware Information Sharing Platform)

➔ **URL:** <https://www.misp-project.org/>

➔ **Description:** Open source threat intelligence platform for sharing, storing, and correlating IoCs and threat data. Used by governments, CSIRTs, and enterprises worldwide.

➔ **Free Status:** Completely free and open source.

MITRE ATT&CK

MITRE | ATT&CK®

➔ **URL:** <https://attack.mitre.org/>

➔ **Description:** Open framework for documenting adversary tactics, techniques, and procedures (TTPs). Widely adopted for threat modeling and detection mapping.

➔ **Free Status:** Completely free and open access.

3

VirusTotal

- ➔ **URL:** <https://www.virustotal.com/gui/home/upload>
- ➔ **Description:** Multi-engine malware and URL scanner. Submit files or URLs and see scan results from dozens of security vendors.
- ➔ **Free Status:** Free with rate limits (Google account required). Premium API available.

4

AlienVault OTX (Open Threat Exchange)

LevelBlue/Labs

➔ **URL:** <https://otx.alienvault.com/>

➔ **Description:** Community-powered threat intel platform offering “pulses” of indicators on malware, phishing, and campaigns.

➔ **Free Status:** Fully free account available with access to community pulses.

5

Shodan

➔ **URL:** <https://www.shodan.io/>

➔ **Description:** Search engine for discovering internet-facing devices and services. Useful for identifying exposed systems.

➔ **Free Status:** Free with limited search and filters. Paid upgrades available.

6

GreyNoise

GREYNOISE

➔ **URL:** <https://www.greynoise.io/>

➔ **Description:** Helps distinguish mass-internet scanning and background noise from targeted threats using IP reputation data.

➔ **Free Status:** Free community account with limited lookups and query capabilities.

STATIONX

CISA KEV Catalog

- ➔ **URL:** <https://www.cisa.gov/known-exploited-vulnerabilities-catalog>
- ➔ **Description:** Government-maintained catalog of vulnerabilities actively exploited in the wild. Used for patch prioritization.
- ➔ **Free Status:** Completely free and maintained by the U.S. government.

Cisco Talos Intelligence

➔ **URL:** <https://talosintelligence.com/>

➔ **Description:** High-quality threat intelligence feeds, malware analysis, and reputation data from Cisco's global telemetry.

➔ **Free Status:** Free access to reputation lookups, analysis, and advisories. No registration required.

Abuse.ch (URLhaus & ThreatFox)

- ➔ **URL:** URLhaus: <https://urlhaus.abuse.ch/>
ThreatFox: <https://threatfox.abuse.ch/>
- ➔ **Description:** URLhaus tracks malware-hosting URLs, and ThreatFox shares actionable indicators of compromise (IoCs). Widely used by defenders and integrated into CTI platforms.
- ➔ **Free Status:** Fully free and community-driven.

10

OpenCTI (Open Cyber Threat Intelligence)

➔ **URL:** <https://www.opencti.io/>

➔ **Description:** Open source platform for managing, storing, and visualizing cyber threat intelligence using structured data models like STIX 2.

➔ **Free Status:** Fully free and open source (developed by CERT-EU and others).
